## **MEDIA RELEASE**

# **WEEDBUSTING FERN TREE**

After thirteen years of battling weeds, the Fern Tree Bushcare Group are calling on Fern Tree residents to help build on the progress made towards reducing the threat of weeds.

As part of Weedbuster Week the Fern Tree Bushcare Group and the Hobart City Council are collecting data on all the weeds in the Fern Tree area to produce the Fern Tree Weed Map. Using Fern Tree Weed Map data, weed densities and locations will be assessed with an aim to come up with an achievable, strategic approach for the Fern Tree Bushcare group, the Hobart City Council and residents to work together on prioritised removal of berry-producing holly, cherry laurel trees and other problem weeds.

**The Fern Tree Bushcare Group, along with the Hobart City Council, is keen to offer advice, information, practical support, and various tempting incentives to control weeds on your land! Bring your knowledge of local weed distribution to contribute to our Fern Tree Weed Map.**

**The Fern Tree Bushcare Group will host a Special Weekend display**

**Where      Fern Glade bend**

**Huon Road**

**When      TOMORROW- Sunday 13<sup>th</sup> September**

**Come and meet the Fern Tree Bushcare Group from 12-2pm**

“Weeds don’t recognise boundaries” said the Acting Fern Tree Bushcare Group Convenor, Bruce Wilson “it can be highly frustrating for Hobart’s Bushcare groups working away at protecting the natural values of our public reserves to see the source of the weed infestation across a fence, knowing that as they remove the weeds there is a high chance the space created will be reoccupied by the same weed”.

Hobart’s Lord Mayor Alderman Rob Valentine said “It’s an ambitious goal that will never be achieved in a week but awareness raising is the first place to start. The Fern Tree Bushcare group must be commended for their passionate persistence and energy to protect the lower slopes of Mt Wellington and spread their anti-weed message”

Details are available on the Council web site [www.hobartcity.com.au](http://www.hobartcity.com.au)
